

DOMAIN NAME

Your domain name is the .com or .net that is the "address" of your website. It's how your users will find you. All domains have to be registered with an authorized domain registrar. Domains are typically renewed annually.

It's important that you know where your domain is registered and how to login to your domain registrar account, in the event that you need to update your contact information, your payment information, or your DNS settings.

Domain Support

Please add any notes here about where to go for domain support. This could include a domain contact email address or phone number.

WEB HOSTING

Web hosting is required for all websites, it's the location of all your website files and database that are made available on a publicly accessible server.

Web Hosting URL

Web Hosting Information

Web Hosting Company

Password

Web Hosting Support

Please add any notes here about where to go for web hosting support. This could include a domain contact email address or phone number.

WORDPRESS

You have a WordPress website, and you can login and manage it as much or as little as you want. Even if you choose to have us do all your website maintenance, it's a good idea to know how and where to login in case you need it for yourself, or need to add a user at a later date, such as a marketing company.

Your Website Login URL

Your website username and password

Username

BACKUPS

It's important that your website is being backed up regularly and those backups are being stored somewhere other than your web hosting account for security. I recommend having at least 30 days of backups.

Backup Provider

How do you access your backups?

ONGOING SUPPORT

We are here to support you as much or as little as you need. Even if you don't subscribe to one of our on-going support plans, you can always contact us for help on an hourly basis.

If you need help with your website, please contact us at support@sumydesigns.com. This puts your request into our support queue, which helps us keep our requests organized and address as quickly as possible.
